## EXPERIENCE

### Cliqki, Lagos Nigeria — Frontend Developer

March 2022 - April 2023

- Worked on the re-development of the Cliqki application, implementing a modern React.js component-based UI system based on the Next.js framework and Typescript, resulting in a more scalable and maintainable codebase.
- Using Reactjs, Tailwind, and CSS, I develop a dynamic newsfeed page from scratch, mimicking the interface of popular social media platforms like Facebook and Instagram. This involved implementing responsive design, optimizing load times, and ensuring seamless user interaction. I also incorporated reusable components to promote code efficiency and maintainability.
- Implemented an Identity Verification feature, utilizing React, TypeScript, and various APIs to ensure secure user authentication. Improved the user experience and strengthened security protocols by integrating third-party verification services. Successfully collaborated with cross-functional teams to deliver a robust and scalable product.
- Resolved critical issues in the payment gateway, ensuring seamless transactions for users and enhancing the overall user experience.
- Implemented an onboarding tour feature using React and CSS to provide new users with a seamless and intuitive experience. The tour guides users step-by-step through the application's features, resulting in improved user engagement and satisfaction.
- Implemented a virtual transaction feature on the Cliqki website enabling users to make more efficient and secure transactions.
- Performed code reviews for team members to ensure adherence to coding standards and best practices, ensuring higher code quality.
- Added new animations to enhance the platform's visual appeal and created an analytics page to track user activities, providing valuable insights to stakeholders and improving the platform's overall performance.

### Calm Global, Lagos Nigeria — Frontend Developer

Sept 2021 - November 2022

- Collaborated with cross-functional teams to develop various web applications, including student and parent portals for universities, an ancestry tracking website, and a hospital analytics website that enabled staff to monitor hospital activities.
- Optimized performance and security by utilizing serverless architecture, caching techniques, and RESTful APIs.
- Provided robust API client for our web application using Axios and defined a base URL for all API calls. I also implemented automatic error handling to ensure a smooth experience for our users.

## SKILLS

### Proficiency

JavaScript, TypeScript, ReactJs, NextJs, Redux, HTML, CSS, SASS, Bootstrap CSS, Redux-saga, Tailwind CSS, Git, Azure, Recoil, Search Engine Optimisation(SEO), debugging, Object-Oriented Programming (OOP), Mobile-first design, Problem-solving.

### Knowledge of

Unit testing, ReactQuery, Data Structures, Algorithms

## LANGUAGES

English - Professional

Yoruba - Native

German - Beginner

## EDUCATION

Crawford University Igbesa, Nigeria - B.Sc Political Science and International Relations

- Created a student activity tracking feature for a student portal. Students can easily track and view their school and portal activities with dates and timestamps, using modern frontend technologies such as React, Redux, and CSS3, ensuring optimal user experience and seamless functionality.
- Designed and developed a responsive timetable feature using React and CSS Grid, providing a user-friendly interface for students to view their class schedules. Integrated with the backend API to dynamically fetch and display real-time updates.
- Integrated a payment system to facilitate seamless and secure transactions within the application, leveraging ReactJS, Redux, and other frontend technologies.
- Demonstrated proficiency in developing, bug-fixing, and enhancing the performance of ReactJS applications to ensure high-quality code that meets coding standards.
- Utilized tech trends and incorporated new solutions to drive meaningful improvements to products and enhance user experience.
- Mentored new developers on the team in the usage of ReactJS and adhering to coding standards, enabling them to improve their skills and contribute to the team's success.

## Freelancing, Lagos Nigeria — *Frontend Developer*

Jan 2021 - Sept 2021

- Successfully developed a real estate website utilizing ReactJS and Redux and other frontend technologies, enabling users to easily update their houses and land listings and access a variety of tools to simplify the buying and selling process.
- Collaborated with a team to develop a user-friendly medical application, focusing on debugging and optimizing its functionality with ReactJS and React Native.
- Demonstrated proficiency in debugging and optimizing the functionality of ReactJS applications to ensure high-quality code that meets coding standards.
- Utilized tech trends and incorporated new solutions to drive meaningful improvements to buying and selling of properties and enhance user experience.
- Worked together with cross-functional teams to improve the overall experience for patients and doctors by developing a platform that enables patients to connect with doctors from anywhere in the country, utilizing ReactJS and other frontend technologies.

## PROJECTS

**Cliqki** — <https://www.home.cliqki.com>

An online advertisement platform for brands and influencers

**Parents Portal** — <http://wissenparent.wissenapp.com>

A university portal for parents

**Students Portal** — <http://portal.wissenapp.com>

A university portal for students

**Der Daily** — <https://derdaily.netlify.app>

A real estate inquiry-making web app

**Diasporal** — <https://diasporal-lecturer-volunteer-133c50.netlify.app/>

Diaspora lecturers can sign up to offer their services as volunteers for educational institutions
